EDUCATION

Saigon University

B.S. in Software Engineering, Faculty of Information Technology

Ho Chi Minh City, Vietnam

Expected 2027

- **Current Year:** 3rd Year Student
- **Core Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management, Software Architecture.

TECHNICAL SKILLS

Backend: Nest.JS, Spring Boot (Java), Laravel, Node.js, .NET

Frontend: Next.js, React, TypeScript/JavaScript, Tailwind CSS, Framer Motion

Database & ORM: PostgreSQL, Prisma ORM, SQL, SQL Server, Entity Framework Core

Tools & Practices: Git/GitHub, Docker, RESTful APIs, WebSockets

PROJECTS

InteractHub - Social Media Web Application

Mar 2026 - May 2026

ASP.NET Core, React, SQL Server | [Live Demo](#) | [GitHub \(FE\)](#) | [GitHub \(BE\)](#)

- Developed a full-stack social media platform featuring posts, stories, friend requests, and real-time notifications via SignalR.
- Designed a normalized SQL Server database with Entity Framework Core and secured RESTful APIs using JWT authentication.
- Configured an automated CI/CD pipeline.

SmartDoc AI - Intelligent Document Q&A System

Mar 2026 - May 2026

Python, LangChain, FAISS, Ollama | [GitHub](#)

- Built a local RAG system enabling users to upload PDF documents and retrieve precise answers in Vietnamese and English.
- Integrated local LLM Qwen2.5:7b via Ollama and Multilingual MPNet embeddings for high-quality semantic search.
- Implemented an automated document processing pipeline with recursive text splitting and vector indexing using FAISS.

Tech Store E-Commerce

Sep 2025 - Jan 2026

Next.js, Prisma, AI RAG, PostgreSQL | [Live Demo](#) | [GitHub](#)

- Developed a comprehensive e-commerce platform for mobile devices with a full-stack architecture.
- Integrated an AI-powered RAG (Retrieval-Augmented Generation) chatbot to assist customers with product inquiries.
- Designed robust database schemas using Prisma ORM to handle products, users, and orders efficiently.

Smart School Bus Tracking

Oct 2025 - Nov 2025

React, Nest.JS, WebSockets, Maps API | [GitHub](#)

- Engineered a real-time monitoring system designed to track school buses to ensure student safety.
- Utilized WebSockets for low-latency, bidirectional data transmission between the server and the tracking dashboard.

EXPERIENCE

Software Development Collaborator

Saigon University

Academic & Capstone Projects

2024 – Present

- Collaborated in student teams to design, build, and deploy full-stack web applications.
- Managed project repositories using Git/GitHub and participated in peer code reviews.
